Check-in 2

TEAM: The Pirates   **MEMBERS**:   Ryan Hansen
DATE: May, 2nd 2017   Rand Almaroof
                                                Robert Cordingly
                                                Reagan Stovall

- ABSENT: Ryan Hansen
- We have observed few patterns in other teams that everyone shared, such as:
    - Having log in pages on start up
    - Asking users for usernames and emails and storing those in a database
    - All group have a separation pattern at some degree for their project types
- Some of the interesting differences and observations we have made are:
    - Orange is the new Green: this team has different types of residents (homes, apartments, housing complex).
- We are following our GUI initial design and improving it.
- For UML, the team is meeting on Tuesday (5/9/2017) to discuss the following:
    - Change the way we manage projects inside UML
    - Change the way projects interface with each other in the Project Interface module.
    - Re-arrange few classes.

*** Please review UML-Discussion-Team-Notes.PDF. The document obtains team members notes on projects and the feedback from other groups.
